DETAILED ACTION

Allowable Subject Matter

1. Claims 2, 4-16 and 18-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The current invention is directed to determine the transmission data rate of a data channel. The data rate is determined by a project output power, which is less than a maximum power. The projected output power is determined based on a transmission power required for the data channel at a particular data rate, and a measured power output averaged over a stated time period.

The closest prior art, US 6,775,548 (Rong et al) discloses a method for determining the data rate of an access channel. The data rate of Rong is determined by the available power (power headroom) of a transmitter (see figure 5; column 8, line 51 to column 9, line 18). Rong fails to teach measuring a transmitter output power by averaging over a period of time.

Since an averaged output power (which can be much higher or lower in the past based on how many channels were in use) cannot accurately reflect the current transmission condition, there is no motivation to modify Rong's reference to measure its transmitter's output power by averaging even though measuring output power as an average was well known in the art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Simon Sing whose telephone number is 571-272-7545. The examiner can normally be reached on Monday - Friday from 8:30 AM to 5:30 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan Tsang, can be reached at 571-272-7547.
